Open date:	Tuesday, 1 October 2024 12:30 PM +13:00
Close date:	Thursday, 31 October 2024 4:00 PM +13:00

Categories:	72141000 - Highway and road construction services
Region:	Waikato
Overview:	<p>This is a Physical Works contract for the demolition and replacement of SH26 Onetai Stream Bridge (BSN841). Onetai Stream Bridge is a 9m long bridge located approximately 14km north of Paeroa and carries SH26 over Onetai Stream.</p> <p>The Contract Works comprise of:</p> <ul style="list-style-type: none"> • Replacement of the existing Onetai Stream Bridge with a bridge comprising a timber superstructure; • Construction of new reinforced concrete abutment; • Construction of new mechanically stabilised embankments with mass block retaining walls; • Construction of instream scour protection measures including reno mattress, rip rap and insitu concreting; • Civil works including safety barriers, pavements, carriage widening, roadside furniture, signage and line marking; • Temporary traffic management; • Service relocations and protection • Temporary Works design including but not limited to temporary propping, craneage and confirming adjacent ground conditions for crane foundations and improvements if needed. • Riparian planting. <p>The Contract period is 60 Working Days and the Due Date for Completion of the Contract Works is no later than 31 March 2025. It is envisaged that the Contractor will utilise a single full road closure to undertake the majority of the site-based Contract works. This road closure has been included as a Separable Portion, with flexibility given to Contractors regarding the timing and duration of the Separable Portion which sits within the Contract period.</p> <p>The new timber superstructure is viewed by NZTA as a prototype solution for sustainable replacement of short-span vehicle bridges. The glue-laminated timber and plywood deck and kerb materials for the new superstructure are being supplied by NZTA.</p> <p>Only tenderers pre-qualified to "Bridge Construction - Level A (3A)" under the terms of the Transport Agency's Prequalification System are eligible to submit a tender.</p> <p>Electronic copies of the Request for Tender documentation are attached to this advertisement.</p> <p>All tender queries are to be submitted via the GETS Q & A Portal.</p> <p>All responses to tender queries/clarifications will be answered by Notice to Tenderer which will be available in the GETS addenda.</p> <p>Tender submissions shall be uploaded to GETS eTender box in two separate files. The GETS file upload limit is 50MB. The files should be labelled:</p> <ul style="list-style-type: none"> • File No 1 -8646 - Proposal excluding Price • File No 2 - 8646 - Price <p>Tender submissions will only be accepted electronically via the GETS eTender Box.</p>

Description: 1. Przedmiotem zamówienia jest dostawa następujących pojazdów, w podziale na części: Część 1: - dostawa 2 szt. samochodów 7 osobowych o napędzie Hybrid Plug - in, - dostawa 1 szt. samochodu 5 osobowego o napędzie Hybrid Plug - in, Część 2: - dostawa 1 szt. samochodu dostawczego o napędzie zeroemisyjnym z zabudową wywrotki z nadstawkami do zbiórki odpadów posegregowanych oraz dostawa i montaż stacji ładowania pojazdów wraz z wykonaniem wewnętrznej linii zasilającej; Część 3: - dostawa 1 szt. autobusu międzymiastowego na ok. 39 miejsc siedzących + kierowca, typu Autokar o napędzie spalinowym Euro VI. 2. Zamawiający wymaga, aby pojazdy były fabrycznie nowe i nie używane. 3. Wymagania sprzętowe i warunki techniczne przedmiotu zamówienia zostały określone w opisie przedmiotu zamówienia - załącznik do SWZ. 4. Zamawiający wymaga, aby Wykonawca załączył do oferty wypełniony załącznik „opis przedmiotu zamówienia” podpisany kwalifikowanym podpisem elektronicznym. Nie załączenie w/w opisu bądź nie wykazanie, że oferowany przedmiot zamówienia spełnia wszystkie wymagania wskazane przez Zamawiającego będzie skutkowało odrzuceniem oferty. 5. Wykonawca, którego oferta zostanie wybrana jako najkorzystniejsza w części 2, przed podpisaniem umowy zobowiązany jest złożyć szczegółowy kosztorys ofertowy dotyczący dostawy i montażu stacji ładowania pojazdów wraz z wykonaniem wewnętrznej linii zasilającej, sporządzony na podstawie załączonych przedmiarów. Kosztorys winien wskazywać ceny jednostkowe dostaw i robót w w/w zakresie, oraz ich wartość ogółem, którą Wykonawca określił w złożonej ofercie. Nieprzedłożenie kosztorysu przez Wykonawcę przed podpisaniem umowy będzie traktowane jako odmowa podpisania umowy na warunkach określonych w ofercie. 6. Wykonawca udzieli następujących gwarancji: 6.1. Część 1: a) gwarancja na silnik i podzespoły mechaniczne dla pojazdów 7 osobowych (ewentualny limit kilometrów wynosi minimum 100 000 km): 24, 48 lub 60 miesięcy (lub więcej), b) gwarancja na silnik i podzespoły mechaniczne dla pojazdu 5 osobowego (ewentualny limit kilometrów wynosi minimum 100 000 km): 24, 48 lub 60 miesięcy (lub więcej). Przy czym w/w okresy gwarancji podlegają ocenie w ramach kryteriów oceny ofert. 6.2. Część 2: a) gwarancja na cały pojazd: 24, 48 lub 60 miesięcy (lub więcej) (ewentualny limit kilometrów wynosi minimum 50 000km), b) gwarancja na akumulatory z limitem min. 160 000 km min. 8 lat, c) gwarancja na stację ładowania pojazdów 5 lat. Przy czym okres gwarancji wskazany w lit. a) podlega ocenie w ramach kryteriów oceny ofert. 6.3. Część 3: a) gwarancja na silnik i podzespoły mechaniczne: 24, 48 lub 60 miesięcy (lub więcej) (ewentualny limit kilometrów wynosi minimum 100 000 km), b) gwarancja na powłokę lakierniczą min. 5 lat, c) gwarancja na zabudowę pojazdu min. 5 lat, d) gwarancja na perforację nadwozia i podwozia min. 6 lat. Przy czym okres gwarancji wskazany w lit. a) podlega ocenie w ramach kryteriów oceny ofert. 6.4. Bieg terminu gwarancji rozpoczyna się od dnia odbioru końcowego, potwierdzonego protokołem odbioru końcowego. Szczegółowy opis przedmiotu zamówienia określa rozdział IV SWZ.

Description: UAT Județul Brașov este beneficiarul contractului de finanțare nerambursabilă a proiectului „ Microbuze verzi în școlile din județul Brașov”_cod P35 în cadrul apelului de proiecte:

”Microbuze electrice pentru elevi”, finanțat prin Programul Național de Redresare și Reziliență / Pilonul VI. Politici pentru noua generație/ Componenta C15: Educație / Reforma 6: Actualizarea cadrului legislativ pentru a asigura standarde ecologice de proiectare, construcție și dotare în sistemul de învățământ preuniversitar/ Investiția 10: Dezvoltarea rețelei de școli verzi și achiziționarea de microbuze verzi care are ca obiect achiziționarea unui număr de 28 microbuze electrice de capacitate diferită, după cum urmează: - 1 microbuz electric de capacitate 8 locuri (din care 1 loc pentru persoane cu dizabilități) + 1 loc pentru conducătorul auto; - 8 microbuze electrice de capacitate 16 locuri (din care 1 loc pentru persoane cu dizabilități) + 1 loc pentru conducătorul auto; - 19 microbuze electrice de capacitate 22 locuri (din care 1 loc pentru persoane cu dizabilități) + 1 loc pentru conducătorul auto. care vor asigura transportul elevilor din 27 de localități aparținând județului Brașov. Realizarea acestei investiții a apărut în contextul schimbărilor climatice ca o soluție de reducere a emisiilor de gaze cu efect de seră cu impact negativ asupra mediul înconjurător prin asigurarea mobilității prin microbuze electrice, prietenoase cu mediul și cu un consum energetic redus, asigurând astfel mijloace de deplasare pentru elevii aflați în zone cu populație scăzută, facilitând accesul la educație de calitate a acestora și protejarea mediului în același timp. Totodată investiția vizează tranziția spre ”verde”, punctul central al agendei Uniunii Europene pentru următorul deceniu, prin care se urmărește îmbunătățirea condițiilor de transport în zonele din mediul rural mai puțin accesibile, care dispun de puține variante de transport, precum și a școlilor din mediul urban care au înmatriculați elevi care nu locuiesc în apropierea unităților de învățământ, parcurgând distanțe lungi către școală. Numărul de zile până la care se pot solicita clarificări înainte de data limită de depunere a ofertelor este de 20 zile. Autoritatea contractantă va răspunde în mod clar și complet tuturor solicitărilor de clarificări în a 11-a zi înainte de data limită de depunere a ofertelor”. Orice solicitare de clarificări trebuie transmisă în SEAP (<https://e-licitatie.ro/pub>). Valoarea estimată a achiziției este 30.172.511,61 lei fara TVA, din care: Lotul 1- Microbuz electric 8 locuri pe scaune din care 1 loc pentru persoanele cu dizabilități + 1 loc pentru conducătorul auto-246.920,17 lei, fără TVA Lotul 2- Microbuz electric 16 locuri pe scaune din care 1 loc pentru persoanele cu dizabilități + 1 loc pentru conducătorul auto- 9.098.696,52 lei, fără TVA Lotul 3- Microbuz electric de capacitate 22 locuri (din care 1 loc pentru persoane cu dizabilități) + 1 loc pentru conducătorul auto- 20.826.894,92 lei, fără TVA

Description: Primaria Caianu Mic dorește achiziționarea a 12 autoturisme noi pur electrice pentru parcul auto, care sunt silențioase și prietenoase față de mediu. Avantajele în utilizarea unui vehicul electric sunt gradul redus de emisii de tip ardere, ceea ce în timp va conduce la un mediu înconjurător mai curat și costuri de exploatare scăzute. Ofertantii trebuie să fie înscrși în lista producătorilor validați de AFM. Autoturismele se vor livra până la data de 15 noiembrie 2024. Autoturismele trebuie să aibă următoarele caracteristici tehnice: Confort: -Oglinzi cu reglaj electric; -geamuri electrice față-spate; -lunetă spate încălzită și ștergător; -banchetă spate rabatabilă 1/1; - aer condiționat manual Siguranță și sisteme de asistență: -A.B.S; -sistem de stabilitate electronică a autovehiculului; -sistem de frânare de urgență automat; -airbag-uri frontale și laterale (cap și torace) pentru șofer și pasager față -airbag-uri de tip cortină pentru pasageri spate; -centuri de siguranță față reglabile pe înălțime; -tetiere reglabile pe înălțime pentru locurile din spate -sistem dedectare presiune pneuri; -sistem de prindere ISOFIX pentru locurile laterale din spate; -cruise control; -regulator și limitator de viteză; -apelare de urgență; -kit de reparație; -martor necuplare/decuplare centuri siguranță pentru toate locurile; -asistență la menținerea benzii de rulare; Senzori acustici față-spate; Sistem de monitorizare a atenției șoferului -sistem de asistență video la parcare cu spatele. Description: Autoritatea contractanta intentioneaza sa încheie contract/contracte care are/au ca obiect: furnizare 2 buc. autoturisme electrice. Investiția se va realiza prin accesarea Programului privind reducerea emisiilor de gaze cu efect de seră în transporturi, prin promovarea vehiculelor de transport rutier nepoluante și eficiente din punct de vedere energetic 2020-2024, denumit generic RABLA PLUS - program finanțat din Fondul de mediu, finanțare nerambursabilă din Fondul de mediu, acordată sub forma ecotichetului, pentru achiziționarea autovehiculelor noi pur electrice sau autovehiculelor noi electrice hibride, program prin care instituția noastră a obținut un număr de 2 ecotichete, în valoare nominală de 120.000 lei / autovehicul. Potrivit Listei solicitanților - proprietari personae juridice de drept public aprobate în cadrul Programului privind reducerea emisiilor de gaze cu efect de seră în transporturi, prin promovarea vehiculelor de transport rutier nepoluante și eficiente din punct de vedere energetic - sesiunea 22.07.2024 - 20.09.2024, în ședința Comitetului de Avizare al Administrației Fondului de Mediu (AFM) din 01.08.2024 (publicată la 01.08.2024), DGRFP Brasov beneficiază de un număr de 2 ecotichete cu valoare unitară de 120.000 lei (240.000 lei valoarea totală a ecotichetelor), conform cererii înregistrate cu Nr. AFM RJE002202470800062. Precizăm că achiziționarea celor 2 autovehicule electrice se va face cu ecotichete RABLA PLUS + valoarea alocata din buget din lista de investitii, neexistând posibilitatea suplimentării cu alte fonduri de de la bugetul de stat. În eventualitatea în care achiziția celor 2 autovehicule electrice nu se va putea realiza cu finanțare din ecotichetele RABLA PLUS, achiziția va fi anulată. Având în vedere perioada de valabilitate a ecotichetelor aprobate instituției noastre, respectiv până la finele sesiunii anului 2024, pentru încadrarea în Programul RABLA PLUS privind reducerea emisiilor de gaze cu efect de seră în transporturi, prin promovarea vehiculelor de transport rutier nepoluante și eficiente din punct de vedere energetic - sesiunea 22 iulie - 20 septembrie 2024, precum și valoarea substanțială a acestor ecotichete care aduc un aport considerabil în economia bugetului instituției noastre, iar termenul de livrare a autovehiculelor nu poate fi mai târziu de 25.11.2024, și pentru a diminua eventualul risc al imposibilității încheierii contractului, se consideră justificată urgentarea procedurii de achiziție publică, în conformitate cu prevederile art. 74, alin. (3) din Legea nr. 98/2016 privind achizițiile publice. Totodată, având în vedere că autovehiculele pur electrice au dimensionarea și caracteristicile tehnice bine definite din fabricație, se consideră că o perioadă redusă la 15 zile pentru depunerea ofertelor, este justificată și suficientă pentru elaborarea ofertelor de către operatorii economici de pe piața produselor de profil. Termenele pentru depunerea / raspunsul , la solicitarile de clarificari / informatii suplimentare: In conformitate cu prevederile art. 160 alin. (1) din Legea nr. 98/2016 cu modificările și completările ulterioare, termenul limită până la care orice operator economic interesat are dreptul de a solicita clarificări sau informații suplimentare în legătură cu documentația de atribuire este de 8 zile înainte de data limită de depunere a ofertelor. În conformitate cu prevederile art. 160 alin. (2) din Legea nr. 98/2016, cu modificările și completările ulterioare, DGRFP Brasov va transmite răspunsul consolidat formulat la solicitările de clarificări/informații suplimentare în a 6-a zi înainte de termenul limită stabilit pentru depunerea ofertelor, în măsura în care sunt transmise în termenul precizat.

Description: Implementation of the digitalisation vision for inland waterway transport as part of the European Green Deal. The Sustainable and Smart Mobility Strategy underlines the need to increase the use of more sustainable transport modes and indicated that the modal share of inland waterway transport and shortsea shipping should increase by 25% by 2030 and by 50% by 2050.

To do so, the NAIADES III Communication indicates that digitalisation and automation are essential to reach these goals and to improve the sustainability, resilience, and competitiveness of inland waterway transport . The Sustainable and Smart Mobility Strategy requires that the transport sector's emissions are reduced by 90% by 2050. To support achievement of these goals digitalisation is thereby seen as an indispensable driver for the modernisation of the entire transport system, making it seamless and more efficient, increasing the levels of safety, security, reliability, and comfort, whilst improving Europe's global competitiveness through efficient and resilient logistics chains. One of the objectives set out in the NAIADES III Communication is to make inland waterway transport smarter, i.a. by further advancing the digitalization of the IWT sector. It is imperative for the IWT sector to keep up with digital developments to improve the sector's competitiveness and ensure that it becomes an active part of broader multimodal chains. Further digitalisation can play a significant role in improving the efficiency and reliability of navigation and traffic management, better integrating inland waterway transport in logistics processes and multimodal chains and reducing the administrative burden and costs of complying with and enforcing legislation. The NAIADES III Communication foresees that the Commission will facilitate the elaboration of a holistic vision for the sector's digitalisation with the contribution of the Digital Inland Navigation Area, NAIADES Expert Groups In order to meet these digitalisation challenges, the following (draft) vision for a digital inland waterway area by 2025 is put forward: By 2035, inland waterway transport in the European Union is a competitive, innovative connected, cyber secure and digital by default mode of transport which is fully harnessing the potential of digital technologies and emerging solutions, enabling seamless integration with other modes of transport as well as automation, by embracing the latest digital achievements and contributing to a better functioning of the Inland waterway single market. It will help overall time efficient, sustainable transport flows and support other modes to decongest.

Description: Der VDV eTicket Service (VDV-ETS) ist für den deutschen ÖPV-Standard „((eTicket Deutschland“ verantwortlich. Dieser stellt die technische und organisatorische Plattform für den Betrieb von einem interoperablen elektronischen

ticketing im öffentlichen Personenverkehr in Deutschland und Luxemburg dar. Neben der Erstellung und Herausgabe des technischen Standards, der Aufstellung von organisatorischen Regeln für Teilnehmer und der Prüfung von eingesetzten Komponenten betreibt VDV-ETS auch zentrale Infrastrukturen für die an ((eTicket-Deutschland teilnehmenden Verkehrsunternehmen und -verbände. Derzeit bereitet die ÖPV-Branche die Einführung einer neuen Version des Standards unter den Namen „((etiCORE“ vor. Diese neue Version des Standards macht es notwendig, den Teilnehmern neue Systeme zur Verfügung zu stellen. Die Hauptaufgabe des ausgeschriebenen Systems ist die Verwaltung der teilnehmenden Verkehrsunternehmen-/verbände und Hersteller. Über dieses System werden außerdem die Sicherheitskomponenten wie SAMs oder PKI-Zertifikate bestellt oder auch Org-IDs und Anträge sowie Dokumente verwaltet. Die Vergabe umfasst folgende Systeme: 1. Registrierungsportal (RP): Hier soll ein Benutzer ein teilnehmendes Unternehmen registrieren können. Das RP muss andererseits dem VDV eTicket Service ermöglichen, diese Registrierung zu prüfen und freizugeben. Es muss ermöglicht werden, verschiedenen Benutzern unterschiedliche Rollen zuzuweisen, so sollen nur berechtigte Benutzer z.B. sicherheitsrelevante Bestellungen ausführen können. Das RP dient als vorgeschaltete Instanz sowohl zum unten aufgeführten ESH als auch für weitere Systeme des VDV-ETS. 2. ((eTicket Security Hub (ESH): Die Bereitstellung eines Systems, über das Kunden im Rahmen von ((eTicket Deutschland Verträge und Anträge verwalten können. Es ermöglicht außerdem zuvor authentifizierten Benutzern, Sicherheitskomponenten für das elektronische **ticketing** zu bestellen. Das System muss zudem in der Lage sein, mit bereits vorhandenen Systemen und Schnittstellen zu kommunizieren und Daten nahtlos auszutauschen. 3. Single Sign On (SSO): Über das SSO soll dem Benutzer nach erfolgreicher Registrierung ermöglicht werden, Zugang zu unseren Plattformen wie ESH, Jira und weiteren Systemen zu erhalten. Ziel des Projekts ist es, eine nahtlose sichere Verwaltung aller sicherheitsrelevanten Aspekte vom ((eTicket-Deutschland zu gewährleisten und gleichzeitig die Benutzerfreundlichkeit und Effizienz zu steigern.

Tender Url: <https://ted.europa.eu/udl?uri=TED:NOTICE:595751-2024:TEXT:EN:HTML&src=0>

Description: M5 is a new metro line that will connect the new city development areas to the east of Copenhagen, including Lynetteholm, Refshaleøen and Kløverparken, with the existing city and transport network. M5 will include a new Control and Maintenance Centre (CMC). The M5 alignment shall be underground from CMC via Lergravsparken to the end shaft at Vester Søgade, and from Lergravsparken to v/Prags Boulevards Øst. The alignment shall transition from underground to elevated via ramp just north of v/Prags Boulevards Øst and be elevated from the ramp to v/Refshaleøen. Metroselskabet expects to build the stretch from Copenhagen Central Station to Prags Boulevard to open in 2035. The part from v/Ref to Kk is planned to open in 2045 and is not part of the upcoming tender for a contractor. However, the Transportation systems will be designed so that they can cover - or be expanded to cover - from København H to Østerport and possible also the full ring and other scenarios that are safeguarded for. Additionally, the branch to the CMC is underground with a Bifurcation located near Jenagade or in connection to the station Lergravsparken, the alignment has a ramp to surface on Prøvestenen. The alignment is currently being developed by a civil works consultant (a joint venture consisting of COWI and ARUP) to make it possible to extend the line/close the ring from Østerport (Kk) and København H (Kh). Also, a joint venture consisting of Rambøll and Systra Denmark has joined the project as Transportation Systems consultants. With the new M5 line, Metroselskabet will be focusing on improving other aspects of future metro lines. Using the UNSDGs as a basis, four main project objectives have been defined with the objective to minimize negative impact and maximising the positive impact of the project.

- Reduce the use of resources and climate impact Metroselskabet has an ambition to reduce the carbon footprint from future metro lines with 50% compared to the existing metro.
- Improve passenger experience and operational robustness The Copenhagen metro run with a low amount of carbon pr. Passenger kilometer, mainly because it is electrically powered, and many people prefer to use the metro when using public transportation. Operational robustness and reliable service is therefore an essential aspect of sustainability.
- Improve safety and working environment Everyone should be able to work without accidents or injuries, both in construction and operations of the new metro line.
- A contribution to the city A new metro line should physically meet and connect with the city in a way that creates urban space quality and leave space for increased urban biodiversity. In order, to ensure that the Transportation Systems construction contract is attractive to the market, Metroselskabet will be conducting a market dialogue prior to releasing the tender for the transportation systems construction contract. Thus, Metroselskabet invites potential interested parties to sign up for market dialogue meetings. The meetings will be individual meetings, and the meeting can be either in person at Metrovej 5, Copenhagen or via TEAMS or a hybrid depending on the preferences of potential interested party. The dialogue meetings will take place during November 11th to November 22nd 2024. Please contact: vij@m.dk if you wish to participate in a dialogue meeting.

Additional Address:

Tender Url: <https://ted.europa.eu/udl?uri=TED:NOTICE:598320-2024:TEXT:EN:HTML&src=0>

Description: This is a prior indicative notice regarding an upcoming tender for a framework agreement on delivery of Validators for public transport in Denmark. After canceling the previous

tender for a Validator Framework Agreement, Rejsekort og Rejseplan A/S is now ready to reissue the tender of the contract. The new tender is expected to be published in mid-October 2024. This prior indicative notice is not an invitation to tender. The upcoming tender will include some significant differences from the previously canceled tender. Among the main changes is that the new tender will be a framework agreement with a single supplier. Additionally, the solution will be based on a Pay-As-You-Go (PAYG) model, meaning that the external end user must check-in and check-out for each leg of their journey. The check-in and check-out must be performed on a Validator using an NFC-card or a payment card.

Description: High-Risk Environment Training service for a European Ministry of Foreign Affairs (MFA) of Finland (hereinafter also "the Client"). The service should include a range of subjects such as personnel security, situational awareness, conflict avoidance and management, routine / non-routine **journey planning**, reaction to incidents, emergency communication, navigation, mines awareness, working with security teams, medical training and kidnap avoidance. The training service should be course form and method of the course should include classroom based

theoretical sessions followed by practical exercises that covered lessons learned. The controlled practical scenarios should be designed to replicate the operating environment and risks the attendees may experience when deployed. After the course each attendee should have an improved level of understanding on the threats associated with operating in high-risk regions, how to best prepare for deployment and a good understanding of the measures they could employ to reduce their risk exposure. In addition to the training service, the service provider must also provide food and accommodation services to the Customer's personnel participating in the course. In addition, the Service Provider shall provide any airport transfers to and from the Service Provider's Training Centre after the course, taking into account the flight schedules of the Subscriber. In addition, the candidate may offer the following services as an optional (the price does not affect the comparison of applications): The provision of the corresponding training package (including training, food, accommodation, airport transfers) as defined in the call for participation and its annexes at a permanent Training Centre in a third country. A permanent Training Centre means the same as described in this request for participation and its annexes. The Service requirements and other specifications are described more detail in the procurement material. The Client selects one (1) Supplier and signs the framework agreement with that Supplier. The contract period starts from signing the framework agreement and is valid until further notice. The maximum value for the fees of the contract is 500 000 euros (VAT excluded).

Tender Url: <https://ted.europa.eu/udl?uri=TED:NOTICE:596032-2024:TEXT:EN:HTML&src=0>

Description: The National Transport Authority (the "Authority") is proposing to commence a procurement competition for a multi-provider framework agreement (the "Framework Agreement") for the supply of high-power charging infrastructure primarily designed to support the operation of battery-electric buses ("EBCI") and associated services and works. It is intended that the proposed Framework Agreement shall deliver the majority of the charging infrastructure necessary to achieve the transition of the public urban bus fleet to zero-emission buses and will cover numerous sites throughout Ireland, including both existing depots and newbuild depots. The Authority is interested in engaging with Original Equipment ("OEMs"), suppliers and other contractors specialising in the aforementioned EBCI scope during this Early Market Engagement round. At a high level, the scope of the proposed Framework Agreement shall include the design, supply, installation, testing, commissioning and maintenance and/or long-term support of EBCI, and associated customer side electrical distribution network upgrades. In terms of scale, the current indicative projection is for upwards of 2,000 high-powered DC charging installations over the term of the Framework Agreement. The envisaged term of the proposed Framework Agreement shall be eight (8) years in total, based on an initial four (4) years, plus four (4) annual extension options, that will be at the Authority's sole discretion. While the Authority intends to acquire EBCI from the successful tenderers awarded a Framework Agreement, it intends to permit other registered contracting authorities to access and award call off contracts via the Framework Agreement. The procurement and packaging strategy for the proposed Framework Agreement is at an early phase of development, and the Authority would like to engage interested parties via the Early Market Engagement Questionnaire, with the intent that further 1-2-1 bilateral discussions may follow. The Authority values participant time, commitment and input into this phased Early Market Engagement round and believes that it is critical to engage with the market to shape the scope of the proposed Framework Agreement in order to ensure sustainability to call-offs and use of the proposed Framework Agreement over the envisaged term in a market with innovation at the fore. The Authority would like to remind interested parties to register on the eTenders platform if not done so already. Interested parties can register at: www.etenders.gov.ie. To register your interest

in participating in the Early Market Engagement round, please access the NTA EBCI Early Market Engagement Project Information Memorandum and Questionnaire, and complete the short questionnaire and declaration, contained within Appendices A and B, and return to the Authority by way of the eTenders platform. This documentation is available to download at <https://www.etenders.gov.ie/epps/pmc/viewPmc.do?resourceId=4295080> The Authority reserves the right to amend tender specifications and tender requirements prior to issue, and this Preliminary Market Consultation serves to alert the market to an early market engagement process.

Description: Dublin City Council seeks to award a Public Works Contract for Civil Engineering Works Designed by the Employer for the construction of the advance works as part of the Dodder Public Transport Opening Bridge (DPTOB) project. The expected duration of the public works

contract is 15 months and it will be established with the following services: (a) Construction of the DPTOB Advance Works; (b) Construction of drive shaft for future tunnelling project; (c) Utility survey and diversion; and, (b) PSCS. The Scope includes a full range of Civil Engineering Works preparing for the construction of the Dodder Public Transport Opening Bridge including but not limited to: • The construction of a pile supported concrete slab and sheet pile wall adjacent to the East bank of the River Dodder; • The partial construction of the DPTOB East Abutment; • The construction of a secant pile wall shaft at the interface between the pile supported slab and the existing land. The shaft is to be used for a tunnel crossing of the River Dodder for district heating installations; • Temporary **traffic management**; • Utility surveys and diversions as required in preparation for the DPTOB Main Contract; • PSCS duties under the Safety, Health and Welfare at Work (Construction) Regulations 2013; • Meetings and liaison with stakeholders as required; • Safety files and As-Built Drawings; and • Handover Reports including any maintenance and operational manuals. Please note that this project is subject to funding. For further information please refer to documentation available to download from www.etenders.gov.ie Resource ID 4254002

Additional Address:

Tender Url: <https://ted.europa.eu/udl?uri=TED:NOTICE:600033-2024:TEXT:EN:HTML&src=0>

Description: De overeenkomst bestaat uit het op afroep uitwerken (maken en aanleveren) van verkeerstechnische tekeningen en/of uitvoeren van tijdelijke verkeersmaatregelen bij (weg)werkzaamheden, evenementen of calamiteiten. De scope van de opdracht bevat de volgende onderdelen: • Het toepassen van tijdelijke verkeersmaatregelen overeenkomstig de CROW Publicatie 96b, bij activiteiten waarbij de opdrachtgever geacht wordt verkeersmaatregelen te treffen (waaronder evenementen). Het betreft de aanvoer, het plaatsen, het in stand houden en het opbreken en afvoeren van alle voor de verkeersmaatregelen benodigde hulpmiddelen, inclusief het in- en buiten gebruik stellen van de tijdelijke verkeersmaatregel; • Het naar behoefte kunnen afroepen van verkeersmaatregelen bij calamiteiten; • Het naar behoefte inzetten (inhuur) van verkeersregelaars en/of verkeersmedewerkers; • Het uitwerken (maken en aanleveren) van verkeerstechnische tekeningen waarop de uit te voeren (tijdelijke) verkeersmaatregelen zijn weer

Op basis van historische gegevens en een prognose van de verwachte inzet gedurende de komende jaren wordt de waarde van de opdracht geraamd met een bandbreedte tussen de €205.000 en €295.000 per jaar, excl. btw. Deze bandbreedte is er in verband met politieke keuzes over verkeersmaatregelen bij evenementen, waarover nog geen besluit is genomen. De genoemde bedragen zijn een indicatie, derhalve kunnen aan de genoemde bedragen geen rechten ontleend worden.
